

CREDIT CARD EXPANSION

MITRON BANK

BY ADITYA SHINDE

Project Details

- Mitron Bank (fictitious Bank) wants to introduce **new line of credit cards** to broaden their product offerings and reach in the financial market.
- **AtliQ Data Services** approached Mitron Bank to implement this project, however top management is unsure about it and they have asked to do a **pilot project** with sample data.
- Data of **4000** customers across **5** cities is provided.

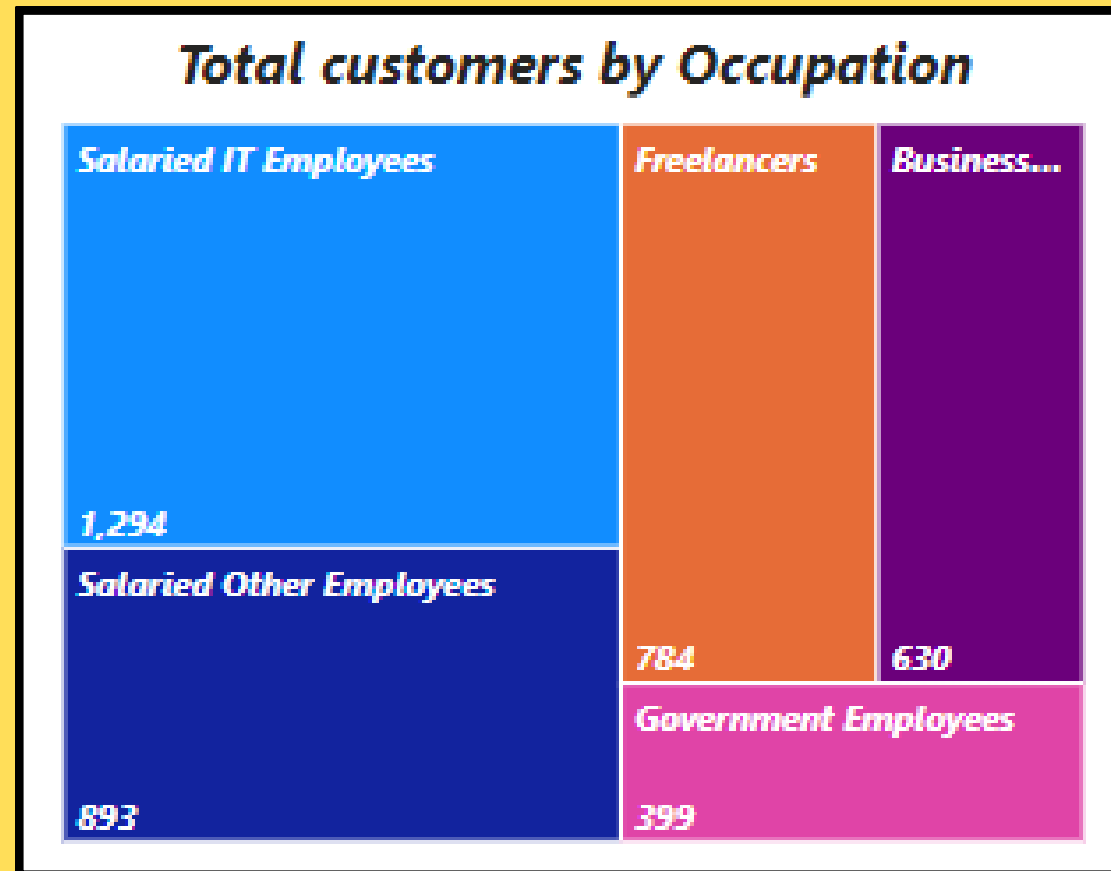

Objectives

- To classify customers based on the **Demography**.
- To find out **Average Income Utilization Rate**.
- To understand **Spending Patterns** of the customers.
- To identify **Key Customer Segments** who will be highest value users.
- To recommend **Credit Card features** as per findings.

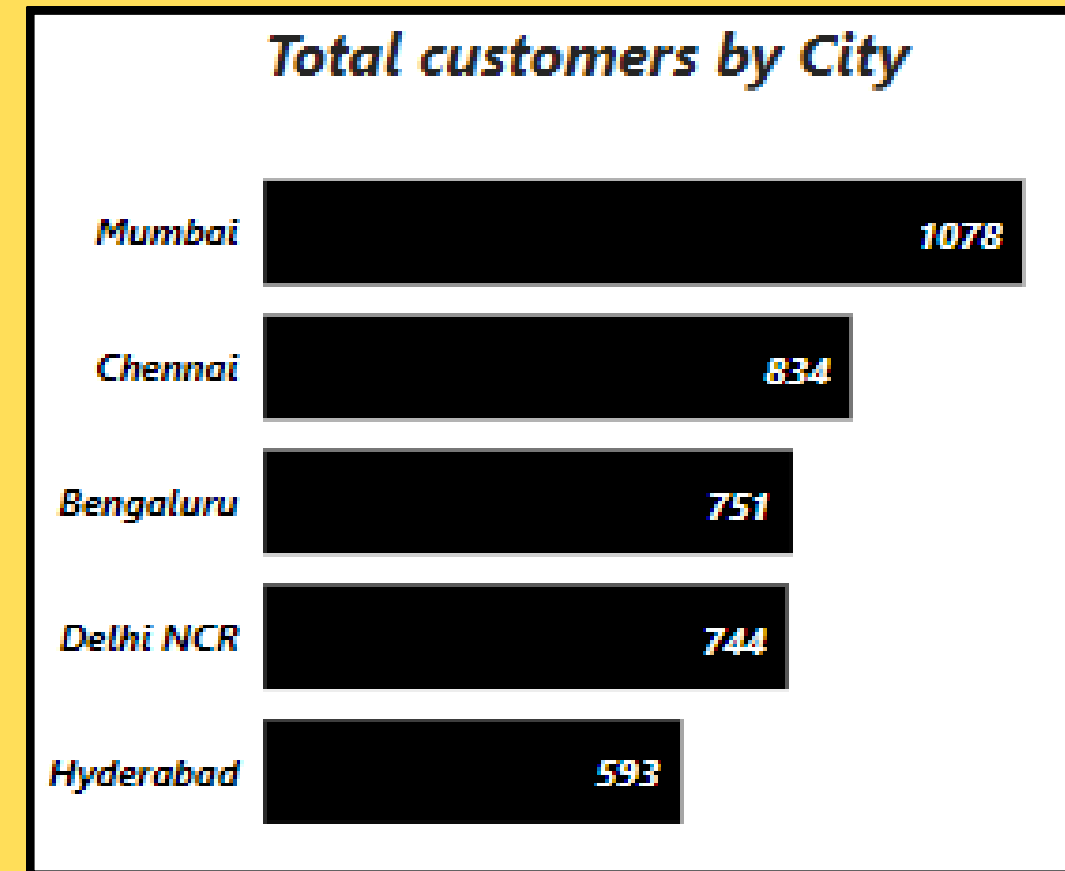

Demographic Classification of Customers

Salaried IT professionals constitute the **largest** occupational group, while **Government employees** represent the **lowest** in numbers.

Mumbai has the **highest** number of customers from the data set, followed by Chennai, Bangalore, Delhi and Hyderabad.

Two-thirds of the customer base is **Male**.

Total customers by Income group

The **majority** of customers fall within the **Lower middle income** bracket, succeeded by upper-middle, middle, low, and high-income groups.

Total customers by Age group

The age group **25 to 34** claims the **highest** percentage of customers at **38%**, followed by 35 to 45, 21 to 24, and 45+.

Total customers by Marital status

Approximately **80%** of the customers are reported to be **married**.

Average Income Utilization Rate

The visuals indicate elevated AIUR levels in cities such as **Mumbai**, **Delhi**, and **Bengaluru**. Additionally, the age groups of **35 to 45** and **25 to 34** exhibit high AIUR, and **Male** customers demonstrate a notable prevalence of high AIUR.

City	Average Income Utilization Rate
Mumbai	51.43%
Delhi NCR	48.03%
Bengaluru	43.46%
Hyderabad	36.25%
Chennai	31.10%

Age group	Average Income Utilization Rate
35-45	46.72%
25-34	43.66%
21-24	40.59%
45+	34.70%

Gender	Average Income Utilization Rate
Male	44.39%
Female	39.92%

Average Income Utilization Rate

Based on the visuals, professions such as **Salaried IT employees**, **Freelancers**, and **Salaried employees** show elevated AIUR. Additionally, the income brackets of **Upper Middle** and **Lower Middle** demonstrate high AIUR, while **Single** customers also exhibit a notable prevalence of high AIUR.

Occupation	Average Income Utilization Rate
Salaried IT Employees	51.04%
Freelancers	45.80%
Salaried Other Employees	42.10%
Business Owners	33.22%
Government Employees	29.00%

Income group	Average Income Utilization Rate
Upper middle income group	46.46%
Lower middle income group	43.38%
Low income group	41.32%
Middle income group	37.92%
High income group	32.11%

Marital status	Average Income Utilization Rate
Single	43.06%
Married	42.77%
